

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently Amended) A method for repairing an injured intervertebral disc of a patient using a cultured connective tissue construct, comprising:
 - (a) forming at least one opening in the annulus fibrosis of the intervertebral disc;
 - (b) removing at least a portion of the nucleus pulposus through the opening in the annulus fibrosis; and
 - (c) grafting a cultured connective tissue construct to close the opening in the ~~annulus~~annular fibrosis,

wherein the connective tissue construct is bioremodelable and integrates with host tissue to close the opening with new tissue, and wherein the cultured connective tissue construct is a layer of extracellular matrix which is synthesized and assembled by cultured fibroblast cells, with the cultured fibroblast cells contained within the synthesized extracellular matrix layer, and wherein said matrix is produced by the cultured fibroblast cells in the absence of exogenous matrix components or synthetic members during the culturing conditions.

2. (Cancelled)
3. (Currently Amended) The method of claim 1[[2]], wherein the extracellular matrix layer comprises ~~protein is~~ collagen.
4. (Cancelled)
5. (Cancelled)
6. (Cancelled)
7. (Currently Amended) The method of claim 1, wherein the cultured connective tissue construct is grafted into the opening in the ~~annulus~~annular fibrosis.
